Testimonial

Davison Ford installed the Safe-T-Stop system in June 2008 and we are very happy with the results!

I can thoroughly recommend the Safe-T-Stop system and Workshop Solutions as a company to anyone in the Automotive Industry. Workshop Solutions also provides an excellent after sales service.

The best features of the Safe-T-Stop system for me are:

- It allows us to easily test every vehicle that enters our workshop and assists us greatly in the upkeep of wheels, alignments, brake adjustments and brake fluid flushes. The safety- T- stop has become an essential part of our workshop and our team would be lost without it. It is well worth the money spent!!!
